OVERVIEW

INSPIRING THE BEST AUTOMATION SOLUTIONS.

CONSULTING

We provide experienced, collaborative consulting services to help you get the most out of your automation.

DESIGN

We engineer and design field ready assemblies and sub-assemblies that improve your automation.

FULFILLMENT

We stock, kit, build, ship and even deliver* your components to ease your procurement and save you money.

SUPPORT

We leverage our network, bringing you manufacturer resources, technical support, and advanced training.

IMPROVING YOUR AUTOMATION

From automation controls to mechanical and pneumatics, our team helps select the right component. Subsequently, we provide a range of solutions from drop-in replacement to cutting-edge systems.

CONSULTING

Our solutions help improve efficiency, increase productivity and reduce costs. Our consultants, engineers and product specialists work with you to evaluate your machines and processes. Working to identify areas for improvement, we'll outline recommendations and develop a solution to fit your application.

DESIGN

Let us develop your designs to save you time, resources and money. You'll know every detail of your solution before it's built. Plus, our team of highly skilled technicians will cut, assemble and test cable harnesses, custom guarding, linear bearings, mounted DIN rails, manifolds, assemblies, sub-assemblies and more.

FULFILLMENT

With extensive resources available, our technical specialists will help you source the components needed to keep your machines running. We quickly process and track your orders, assuring you have your items when you need them.

SUPPORT

Our knowledgeable and experienced staff is available to answer your questions. Plus, our extensive network allows us to pull in the additional resources you need. Moreover, our training services will get you up and running quickly for less.

*Delivery is subject to approval. Contact us to set up a delivery schedule.
