

Rittal – The System.

Faster – better – everywhere.

Mission-Critical IT Infrastructure for U.S. Government

Facing fragmented vendors, evolving security mandates, and AI-driven workloads, government IT teams need consolidated, mission-enabled solutions that arrive fast and scale on demand. With Rittal, you get a **single-source portfolio of standardized, high-security enclosures and turnkey edge-to-data-center packages**—fully AI-ready and backed by U.S. manufacturing and local support.

What's in It for You?

- **Vendor Consolidation:** Streamline procurement with a complete, standardized solution set from one supplier
- **Mission-Ready Deployment:** Pre-configured, turnkey packages install quickly without custom integration delays
- **AI-Ready Infrastructure:** Climate control systems are designed for high-density and AI applications
- **High-Security Assurance:** Enclosures provide industry-leading protection and access control
- **Seamless Scalability:** Modular cabinets, power, and cooling add-ons grow with you
- **U.S. Support & Supply:** Rapid deployment from our Urbana, OH facility and nationwide distribution network, as well as on-site services

A Complete Portfolio for Success

Rittal's comprehensive portfolio is an ideal fit for U.S. government IT applications, offering reliable and scalable solutions that are **mission-ready anywhere you need them.**

Security Indoors – TS IT Edge Micro Data Center

- **Multiple Sizes for Any Space:** Securely host critical equipment in practically any indoor environment with a range of suitable sizes from small wall-mounted enclosures to full-size cabinets
- **A Complete Solution:** Combined power, cooling, monitoring, and security components create a turnkey, self-contained IT infrastructure solution

Security Outdoors – CS Toptec Micro Data Center

- **Deploy Anywhere Outside:** High resilience with a UV-resistant paint finish, double-walled design to support passive heat dissipation, and outdoor protection with a NEMA 3R rating
- **Customize to Your Needs:** Choose from small to large sizes and built-in climate, power, physical-access controls, thermostat, hygrometer, and environmental monitoring components

AI-Ready Climate Control – Direct Liquid Cooling (DLC)

- **Performance Specific to You:** Choose from a range of cooling solutions to meet your specific application requirements
- **Matched to Your Infrastructure:** Flexible solutions are available, including In-Rack CDUs and scalable systems that provide up to 1MW of heat removal
